# Subject Index

**A**

Absorption rate 43
Acetylcholin 81
Activity 99
Addiction 204
Age effects 170
Alcohol 88
Alpha-adrenergic receptor 201
Alpha-Adrenergic-receptor affinity 101
Alpha-Adrenoceptors 226
Alpha-receptors 263
Amitriptyline 35, 43, 201
Amnesia 74, 93, 129
Amphetamine 191, 213, 256, 269
Amygdala 66
Analgesia 365, 393
Animal model 275
Anticholinesterase 391
Anticonvulsants 93
Antidepressants 137, 161
Antipsychotics 29
Anxiolytics 245, 290
Apomorphine 166
Atropine 13, 275
Avoidance 93, 173, 326
Avoidance learning 66
Azidomorphine 329

**B**

Barbiturate 13, 349
Behavior 204
Benzodiazepam 232, 237
Beta-Endorphin 125
Beta-receptors 263
Binding 132
Bioavailability 43
Blood pressure 325

**C**

Carbohydrate 321
Catalepsy 393
Catecholamines 109, 129, 349
Cathinone 269
Cerebral cortex 201
Cerebrospinal fluid 297
Chlordiazepoxide 182, 280
Chlorpromazine 29, 182
Circadian rhythm 173
Citalopram 161
Clonidine 226
Clorgyline 221
Cocaine 23
Codeine 329
Conditioning 326
Consolidation 88
Convulsants 93
Cortisol 125

**D**

*d*-Amphetamine 23, 383
Depression 23, 105, 297, 360
Deprivation 197
Desipramine 201, 297
Diazepam 132, 149, 232, 237, 245, 290
Discrimination 132, 245
Dogs 204
DOPAC 71, 166, 365
Dopamine 71, 101, 213, 263, 365
Dopamine metabolism 260
Dopamine receptors 122
Dopamine release 269
Drugs 232
Drugs, neuroleptic 122
Drug classification 33
Drug reaction, psychiatric 105
Drug stimulus 245
Drug tolerance 326

**E**

EEG spectrum 33
Endorphins 51, 99, 321
Enkephalin 99, 217
Enzyme 344
Escape performance 263
Ethanol 54, 241, 256, 260
Extinction 280
Extrapyramidal side effects 306

**F**

Fat 321
Fear 326
Fentanyl 329
Fighting, shock-induced 157
Fluoxetine 66
Flurothyl 97
Food intake 217

**G**

GABA 143
Geriatrics 170
Grooming 355
Growth hormone 126

**H**

Hallucinations 105
Hallucinogens 326
Haloperidol 33, 166, 182, 263, 316
Heroin 329
Human memory 88
Humans 1, 4, 33, 35, 43, 51, 74, 88, 105, 115, 122, 125, 170, 191, 208, 232, 237, 297, 306, 325, 344, 360, 369, 379, 389, 391
HVA 166
Hyperalgesia 250
Hypnotics 241
Hypothalamus, lateral 58

**I**

Imipramine 66

**K**

Ketobemidone 329

**L**

*l*-Amphetamine 23
Learning 74, 93, 132, 166, 389
Lesions, lateral septal 280; medial septal 280
Levorphanol 329
Lithium 374
Locomotion 166
Locus coeruleus 58, 226
Lordosis 153

**M**

MAO-A 4
MAO-B 4
Marihuana 208
Memory 74, 93, 132
Memory facilitation 88
Meperidine 221
Mescaline 326
Mesolimbic 71
Mesolimbic area 316
Methamphetamine 316
Methanol 329
Metabolism 35
Metergoline 66
Methylphenidate 23
Mianserin 137
Mice 81, 93, 99, 129, 173, 241, 260, 263, 349, 355, 365
Microinjection, intracerebral 66
Monoamine agonist 217
Monoamine antagonists 271
Monoamines 125, 297
Morphine 17, 58, 99, 149, 204, 217, 250, 329
Morphine dependence 271
Motor activity 256
Mouse-killing 157
Multivariate analysis 182
Muscimol 71, 393

**N**

Naloxone 17, 97, 99, 125, 321, 353, 355
Naltrexone 17, 51
Narcotics 221
Neuroleptics 170
Nicotine 310

Noradrenaline 187, 297, 365
Noradrenaline uptake 137
Norepinephrine 263
Nortriptyline 35, 43
Novelty 355

**O**

Olfactory bulbectomy 66
Open field 226
Opiate 217
Opiate antagonists 51
Opiate receptors 260
Optical isomers 137
Ovariectomy 391

**P**

Pain sensitivity 157
Papaverine 129
Pentobarbital 13, 54, 182
Perphenazine 306
Personality 187
Pharmacokinetics 115, 208, 241
Phencyclidine 97
Phenelzine 201
Phenothiazines 29
Phosphodiesterase 129
*p*-Hydroxynorephedrine 23
Physostigmine 81, 275
Pigeons 221
Pigs 201
Piperoxane 245
Plasma 8, 306
Plasma levels 208
Platelets 297, 344
POMS 191
Prenatal drugs 349
Pressor sensitivity 4, 8
Primates 213, 329
Prolactin 125, 306, 321
Propranolol 263
Prostaglandins 241
Psychosis 105, 306

**Q**

Quantification 275

**R**

Rabbits 269
Rat brain 101
Rats 13, 16, 23, 29, 54, 58, 66, 71, 97, 101, 109, 132, 137, 143, 149, 153, 157, 161, 166, 177, 182, 187, 197, 217, 226, 245, 250, 256, 271, 275, 280, 290, 310, 316, 321, 326, 339, 374, 383
Reinforcement 204
Reinforcement, partial 280
Reserpine 28
Response, oculomotor 237
Response rate 182

**S**

Saccades 232
Saliva/plasma ratios 115
Schizophrenia 51, 122, 170, 344, 379
Scopolamine 13, 74, 81, 383
Sedation 353
Self-administration 197
Self-ratings 353
Self-selection 321
Self-stimulation 16, 23, 58
Serotonin 1, 66, 109
Serum cholinesterase 391
Serum levels 170
Sex differences 344
Sexual behavior 153
Shock 132
Shock discrimination 250
Shock, electroconvulsive 201
Shock, inescapable 263
Signal detection 383
Sleep-wake-cycle 369
Stimulation 226
Stress 81, 326
Striatum 316
Substantia nigra 58
Supersensitivity 109
Suppression 290

**T**

Taste aversion, conditioned 149
Tetrabenazine 221
Thiothixene 170
Thrombocytes 1
Tolerance 54, 316
Tremor 275
Tyramine 4, 8

**V**

Vasopressin 379

**W**

Water intake 217

**Y**

Yohimbine 245

**Z**

Zimelidine 297
